Radon Defense is a licensed Radon Gas Testing and Reduction company. We provide certified radon testing in homes across the Northern Virginia and surrounding areas. When radon levels are found to be above the EPA action level, we specialize in designing and installing the radon reduction systems.

Our regular testing price is \$165.00, and our radon reduction systems are all priced specific to the house in need.

We will be offering a \$40.00 off of radon testing to the members and will be offering a free radon reduction system discharge upgrade to 3x4 aluminum down spout, over the standard system PVC piping discharge (\$75.00 value).

All of our radon testing technicians and our mitigators are certified through NRPP.

These discounts are effective for one year from the date of acceptance.
